

HARSH BHAVSAR

Full Stack Java Developer (Spring Boot · REST APIs · MongoDB)
dev.harsh.bhavsar@gmail.com · +91 8530108748 · Ahmedabad, Gujarat · Open to Remote

SUMMARY

Full Stack Java Developer with 2+ years of experience building enterprise-grade REST APIs and backend services with Spring Boot and MongoDB, alongside JavaFX desktop clients, for high-transaction POS systems in retail, restaurant, and salon domains. Owns features end-to-end — schema design, API development, and UI integration. Uses AI-assisted tools (Claude CLI, Cursor AI) daily to speed up delivery and improve code quality, and regularly mentors junior developers on backend and database best practices.

SKILLS

- **Backend:** Spring Boot, Spring MVC, Spring Data MongoDB, RESTful API design, Java 21
- **Database:** MongoDB — schema design, aggregation pipelines, indexing & query optimization
- **Frontend:** JavaFX, FXML, Scene Builder — custom components, data binding, responsive layouts
- **Languages:** Java 21, Dart, HTML/CSS
- **Mobile:** Flutter (basic — personal project experience)
- **Tools & AI:** Maven, Git, IntelliJ IDEA, Postman, MongoDB Compass, Cursor AI, Claude CLI

EXPERIENCE

Software Development Engineer — Microtech Outsourcing Services LLP

Sept 2025 – Present

- Designed and delivered three production POS platforms (retail, restaurant, salon) using JavaFX, Spring Boot, and MongoDB, deployed across [X] client locations.
- Built RESTful APIs handling [X] transactions/day; optimized MongoDB schemas, queries, and compound indexes, cutting average query time by [X]% during peak-hour loads.
- Built custom JavaFX UI components and FXML layouts used across all three POS product lines.
- Integrated AI tools (Cursor AI, Claude CLI) into the team workflow, reducing feature turnaround time by [X]%; mentored [X] junior developers on Spring Boot and MongoDB best practices.

Software Developer Intern (Full-Time Track) — Microtech Outsourcing Services LLP

Sept 2023 – Sept 2025

- Worked full-time as a contributing team member on live production POS projects from day one, not on training exercises, under the college's full-time internship track.
- Developed real JavaFX/FXML UI screens and Spring Boot backend endpoints shipped to actual clients.
- Handled MongoDB data modeling and REST API integration in a live production environment with real business impact.

PROJECTS

Retail POS System

JavaFX · Spring Boot · MongoDB

- Barcode scanning, inventory tracking, loyalty programs, real-time sales dashboard, multi-payment support (cash/card/wallets), and role-based access control.

Restaurant POS System

JavaFX · Spring Boot · MongoDB

- Visual floor plan with live order tracking, Kitchen Display System integration, menu modifiers, split-payment billing, tip/tax handling, and ingredient-level inventory.

Salon POS System

JavaFX · Spring Boot · MongoDB

- Appointment scheduling with calendar view and automated SMS/email reminders, customer service history, staff scheduling with commission tracking, and auto-reorder inventory.

EDUCATION & LANGUAGES

Bachelor of Engineering

Grade: 9.22

Languages: English, Gujarati, Hindi

Field: Information Technology

Silver Oak University

Diploma Engineering

Grade: 9.10

Field: Computer Engineering

Government Polytechnic, Gandhinagar

ADDITIONAL INFORMATION

- Built a personal project in Flutter/Dart, gaining basic working knowledge of cross-platform mobile app development.
- Actively upskilling through hands-on use of AI-assisted development tools (Claude CLI, Cursor AI) for code review, debugging, and rapid prototyping in daily engineering work.
